

Himel Industrial Automation Catalogue

Reliable made affordable

About Himel

Himel is a multinational manufacturer and provider of electrical products successfully combining global expertise with local knowledge.

Founded by a Spanish entrepreneur in 1958, the company pioneered in exporting quality electrical enclosures, establishing Himel brand globally. Today, our global footprint and technology enable us to provide the best combination of affordable and reliable offers for Low Voltage Power distribution, Industry Automation and Home Electric to our long-term customers and partners in over 50 countries where we are present.

Himel. Reliable made affordable

Himel

Variable Speed Drives (VSD)

Himel variable speed drives offer you a wide range of fully tested and ready-to-connect motor control possibilities. From simple pump and fan applications to complex, high-performance machines, we have a reliable affordable drive for you, no matter what you need.

BASIC Variable Speed Drive

BASIC

Rated voltage / frequency	Power Rating	04
230V Single Phase	0.4...2.2kW	
230V Three Phase	0.7...2.2kW	
380V-440V Three Phase	0.4...15kW	

EXPERT Standard Variable Speed Drive

Expert standard

Rated voltage / frequency	Power Rating	04
230V Single Phase	0.7...2.2kW	
230V Three Phase	0.7...160kW	
380V-440V Three Phase	0.7...850kW	

SMART Pump Variable Speed Drive

SMART Pump

Rated voltage / frequency	Power Rating	27
230V Three Phase	2.2...45kW	
380V-440V Three Phase	2.2...160kW	

Solar Variable Speed Drive

Solar

Rated voltage / frequency	Power Rating	57
220V Single Phase	0.4...4kW	
380V-440V Three Phase	0.7...160kW	

HASBS Soft starter

HASBS

Rated voltage / frequency	Power Rating	68
380V-440V Three Phase	11...600kW	

HASXS Soft starter

HASXS

Rated voltage / frequency	Power Rating	68
380V-440V Three Phase	11...600kW	

High Performance

Improved Energy Savings

Multitude of Function

Easy to Use

Longer Lifetime

Himmel Variable Speed Drives (VSD) Family

* 2S = 200-240V Single Phase, 2T = 200-240V Three Phase, 4T = 380-440V Three Phase

Your Benefits

Features		Your benefits
High performance		
	◆ Excellent overload performance: 150% 60s, 180% 3s, 200% 1s (normal test environment) ◆ High start torque performance: 0.5Hz, 150% ◆ Excellent current control capability : The inverter provides sufficient stable output torque when the load is suddenly changed to avoid trip operation	◆ Improves productivity of machine ◆ Less interruptions of the production line
Improved energy savings		
	◆ Integrated Eco-mode for V/f and V²/f automatically adapts the motor magnetic flux to save energy. ◆ Improved special PID control with sleep mode helps to save more energy for pump application	◆ Energy savings during low dynamic load cycles such as pump and fan. ◆ Increases the potential savings by up to 70%. ◆ Greatly reduces the return time of investment.
Multitude of function		
	◆ With a new software platform, our VSDs offer more functions such as flexible V/F curve, 16 stage multi- speed control, command binding, industry specific functions, and many more. ◆ Easy to communicate with upper controller via built-in RS485 Modbus protocol .	◆ No additional upper controller is needed for stand-alone machine, hence saving the system integration cost. ◆ Easy to do the system integration for large production line and long distance communication
Easy to use		
	◆ Compact design and side-by-side mounting, din-rail installation. ◆ High accuracy motor parameters self-tuning function ◆ Supports pluggable keypad and extension keypad ◆ Wall-through mounting ◆ AVR (Automatic voltage regulation) technology	◆ Makes it possible to use in smaller cabinets ◆ No need to set motor parameters anymore ◆ Easy to operate and maintain
Longer lifetime		
	◆ Stable operation under main input voltage fluctuations. Reliable operation with net tensions between 380 V and 440 V (-15%/+10 %) ◆ Fully coated PCB ◆ Dust shield cover ◆ Better cooling and removable fan design	◆ Wider voltage range, increases robustness of the drive in difficult environment ◆ Automatic adaptation in case of unstable power supply ◆ Longer life in high humid and high dust occasions ◆ Easy to maintain

SPECIAL FEATURES & BENEFITS

PID with sleep mode

- ◆ Water supply PID adjustment: If the feedback pressure is higher than the set pressure, start the sleep detection to save more energy.
- ◆ After the sleep time delay, if the feedback pressure is still greater than the set pressure, the VSD enters into the sleep mode and slows down to the lower frequency
- ◆ When the feedback pressure reach to the wake up threshold pressure and the wake up detection time passes, it will start automatically
- ◆ Target applications: Pump for HVAC, Water /Waste water

E B

Non-stop function

- ◆ When an instant power loss occurs, the VSD guarantees the continuous operation of the production line, which meets the continuous operation process requirement in conditions like lightning, large power grid impact and unstable power supply environments.
- ◆ Target applications: Chemical fiber, textile

E B

Easy to add customized function like fixed point stop control

- ◆ Always stop at fixed point
- ◆ When there is a stop command, the motor slows down to the lower speed point, searches for a fixed stop point (usually connected to DI input by a sensor), stops at this point, and triggers an output position signal.
- ◆ Target applications: Needling machine, rotating table

E

Simple PLC

- ◆ Multistage speed control for up to 16 stages. Frequency, time, timer unit and direction for each stage can be set individually.
- ◆ PLC operation mode:
 - Single cycle (After a single cycle it keeps running at final value)
 - Continuous cycle
- ◆ No need for upper controller
- ◆ Target applications: Fan, ball mill, centrifuge

E B

Main + auxiliary frequency set

- ◆ Receives the frequency in any state, such as I/O, simple PLC, PI closed loop, multi-speed state. It uses auxiliary frequency for super precise speed.
- ◆ Target applications: Synchronization use case

E B

Fixed-length control

- ◆ Use DI4/DI5 (DI4/DI5 = 44) to input speed pulse for real-time length measurement. When the set length (set by FC.14) is reached, it triggers the length reached signal, and the fixed-length function is realized.
- ◆ Target applications: Textile machine, cable drawing machine

E B

Sagging function

- ◆ When more than one motor drives the same load, this function can be used to adjust the speed of the motor for uniform distribution of load.
- ◆ Target applications: Tension control in chemical industry and roll control in glass and metallurgy industry

B Basic

Wherever you need an efficient motor, a variable speed drive is a must...

BASIC Series: Small & Simple General Purpose Applications

EXPERT Series: Pumps, Fans & Advanced General Purpose Applications

0.4kW ~ 850kW
230V | 380V-440V

Target Applications

BASIC Series

Small machines:

- ◆ Bread machine
- ◆ Bag machine
- ◆ Carving machine

Simple applications:

- ◆ Small conveyor
- ◆ Small fan
- ...

EXPERT Series

Pumps:

- ◆ Water pump
- ◆ Paper mill and pulp pump
- ◆ Sewage pump
- ◆ Fire patrol pump
- ◆ Rod pump

Fans:

- ◆ Industrial fan
- ◆ Air blower
- ◆ Ventilation

Heavy & complicated machines:

- ◆ Material handling machine
- ◆ Textile machine
- ◆ Material working machine
- ◆ Industrial washing machine
- ◆ Air compressor
- ◆ Construction elevator

Advanced applications:

- ◆ Metal & mining process
- ◆ Petrochemical

Target Applications

■ Irrigation

■ Sewage

■ Fountain

■ Sand pump

■ Circulating pump

■ Photovoltaic pump

■ Rod pump

■ Drying

■ Ventilation

■ Dust removal

■ Air blowing

■ Hot surface treatment

■ Air supply fan for boiler

■ Industrial fan

■ Punching

■ Grinder

■ Textile

■ Carving

■ Sawing machine

■ Metal work

■ Plastic work

KNOW YOUR MACHINE BETTER

HVAC, Water and Waste Water

E B

Fans, Pumps, and Air Conditioning

- ◆ Integrated Eco-mode on V/f and V²/f control automatically adapts motor flux to save energy.
- ◆ Improved Special PID control with sleep mode for pump application can help to save more energy.
- ◆ Speed tracking: For smooth catching and restarting of a running fan.
- ◆ Dry pump protection, automatically detects a dry running pump to protect the equipment.

Textile and Dyeing

E

Heat setting stenter, twister, air-flow spinning, spinning machine, thin-film machine, chemical fiber industry, and needling machine

- ◆ Separate cooling channel: Detachable cooling fan design makes it easy to clean cotton.
- ◆ Wall-through mounting option(185kW) , dust shield cover option (22kW) and dust filter option
- ◆ Enhanced PCB coating
- ◆ Wide input voltage range, able to work for a long time under low voltage environments.
- ◆ Non-stop function to guarantee the continuous operation of production line.
- ◆ Fixed-length control and fixed-point stop control
- ◆ Main + auxiliary frequency set

Woodworking machinery

E B

Wood and veneer cutting machines, planers, peeling machine, carving machines

- ◆ Integrated brake choppers: No need to purchase an external brake chopper.
- ◆ DIN rail mounting and quick I/O connection, quick and easy installation and maintenance.
- ◆ Multiple display options: Extendable LED/LCD display keypad. Integrated multi-stage speed control (16 steps) and simple PLC function without any additional PLC.
- ◆ High start torque, high frequency output (650Hz), accurate speed control for highly dynamic applications to improve the productivity .

Metal processing machinery

E B

Lathe, grinder, drill, planer, boring, cold forging, and engraving machine

- ◆ Compact design
- ◆ DIN rail mounting (up to 5.5 kW) and side by side mounting (up to 22 kW).
- ◆ High start torque, high frequency output (650Hz), and accurate speed control for highly dynamic applications to improve the productivity.
- ◆ Integrated brake chopper.
- ◆ Over excitation braking can help to reduce braking times by up to 50% without any external braking resistor.
- ◆ Sagging function
- ◆ Main + auxiliary frequency set

Food and packaging

E B

Conveyor, blow molding, blender, cutter, and labeling machines

- ◆ Compact design
- ◆ DIN rail mounting (up to 5.5 kW) and side by side mounting (up to 22 kW).
- ◆ Counter function using DI4/DI5
- ◆ Extendable LED/LCD display keypad support for convenient and safe monitoring and operation.
- ◆ Integrated multi-stage speed control (16 steps) and simple PLC function without any additional PLC.
- ◆ Fixed-length control for cutting process.
- ◆ Fixed-point stop control

Rubber and plastic machinery

E B

Scroll extruder, pelletizer, and bagging machine

- ◆ Compact design
- ◆ DIN rail mounting (up to 5.5 kW) and side by side mounting (up to 22 kW), to save cabinet space.
- ◆ High start torque, high frequency output (650Hz), accurate speed control for highly dynamic applications to improve the productivity .
- ◆ Precise control to ensure the material thickness evenly, in order to save cost and ensure the quality of products.
- ◆ Torque limit and slip compensation, especially used for constant output torque. Minimize the torque fluctuations and improve the extrusion process quality.

EXPERT Series

Accessories

Adapted for harsh environment

Dust-proof design: Comprehensive anti-corrosion coating and independent air duct design. Optional dust preventing accessories can also be installed to increase overall protection capabilities against high humid or excessively dusty environments.

Target Applications:Textile machines

Dust Gauze

EXPERT Series

Dust Shield

EXPERT Series
XS

Modular Design

Easy fan replacement : No need to disassemble the entire VSD for a quick fan replacement. This ease of fan change makes the VSD ideal for applications like wind machine that need regular cleaning of air ducts.

Easy Maintenance

Modular plug-and-play fan design makes it easy to replace fan without dismantling the product.

Modular Keypad Design

Operating keypad can be installed on the cabinet's door.

Accessories

Great adaptability to environment

Power grid: Suitable for neutral grounded power grids.

EMC: Enhanced electromagnetic interference immunity against disturbances like surge, electric noise, high frequency noise and static electricity etc.

Power grid adaptability

If installed in an IT system or an angular grounded TN system, remove the EMC screw to disconnect the safety capacitor in order to make it suitable for the grid system with neutral grounding.

EMC

1. Special surge-proof design
2. The control board is completely isolated (COM-GND)
3. All inputs and outputs have optocoupler isolation.
4. Meets IEC61800-3 industrial standard

Easy and comprehensive installation

Comprehensive installation ways to fulfill all kinds of applications:

- ◆ Cabinet
- ◆ Wall-mounting
- ◆ Din rail
- ◆ Flange mounting

Wall-mounting / Din-rail
installation

Cabinet / Wall-mounting
installation

Flange mounting installation

System Architecture

Options for System Integration

Push Buttons (HLAY5)

- Degree of protection: IP44 (IP65 with protection cover)
- Type: Flush button / Mushroom / Selector switches / Key switches / Emergency stop / Illuminated / Double / Pilot light
- Drilling / Cut-out for mounting: Ø22mm
- Standard: IEC 60947-5-1

Indication Light (HLD11)

- Degree of protection: IP65
- Type: Full cover head/ Half cover head/ Long terminal/ Short terminal
- Color: White/ Green/ Red/Yellow/ Blue
- Drilling or cut-out for mounting: Ø22mm
- Standard: IEC 60947-5-1

Relay (HDZ9)

Rated Current: 3A, 5A, 10A

- Poles: 2-pole, 3-pole, 4-pole
- Maximum Rated Operating Voltage: 690V
- Rated Operating Frequency: 50/60Hz
- Coil Specification: DC: 6V~220V; AC: 6V~380V
- Additional Feature: Rotary push button
- Certificate: CB, CE

Contactor Relay (HDZ3)

- Pole: 3-pole
- Coil Voltage: 24-440V
- Coil Frequency: 50Hz, 50/60Hz
- Certificate: CE

Miniature Circuit Breaker (HDB9)

- Elegant and clear indication window
- New clip design makes it easy to install
- Square terminal and connection holes makes it more secure to connect wiring
- Specifications
 - Rated Current: 1 – 63A
 - Breaking Capacity: 6kA, 10kA
 - Frame: 63A
 - Poles: 1P, 2P, 3P, 4P

Molded Case Circuit Breaker (HDM3)

- Easy Installation**
The double-deck cover design of the HDM3 series assures easy installation and removal of accessories.
- High Performance**
The patent design in HDM3 ensures quick extinguishing of arc.
- Secured Operation**
HDM3 is trustworthy and safe for use due to the double-deck cover design.
- Specifications**
 - Frame: 63, 100, 160, 250, 400, 630, 800, 1250A
 - Rated Voltage: 400/415V, 50/60 Hz
 - Breaking Capacity: 18kA - 85kA
 - Rated Current: 10A - 1250A
 - Poles: 3P, 4P
 - Tripping type: Thermal Magnetic, Magnetic

Protection type: Power distribution, Motor protection
Connection: fixed-front connection, fixed-rear connection, plug-in connection, draw-out rear connection
Standard: IEC 60947-2
Certificates: CE, KEMA (TUV), CB
Operating Temp: 40°C & 50°C

SMART Pump (SP)

SMART Pump (SP) drives are full-featured dedicated drives for parabolic load applications like pumps, fans, and chillers. SP drives have a wide range of integrated features like multi-pump control, dry run protection, and energy calculation, pump cleaning, fire override mode, frost, condensation and hammer effect protections to meet the needs of pump, fans and chillers for modern buildings.

Motor Capacity (kW)																	
2.2	3	4	5.5	7.5	11	15	19	22	30	37	45	55	75	90	110	132	160
HAV-SP-4T*																	
HAV-SP-2T**																	

*4T: 380V 3 phase

**2T: 230V 3 phase

Improved Energy Savings

With many integrated control modes like ECO-mode, V^2/f , and PID with sleep mode.

High Robustness

- Stable operation in difficult environments
- Built-in category C3 EMC filter (≥ 11kW)

Special program functions

- Multi-pump control
- Energy meter
- Flow calculation
- Pump cleaning
- Fire Override mode
- Dual Ramp

Pump-specific protections

- Dry run detection
- Frost and condensation protection
- Hammer effect protection
- Undervoltage, overvoltage, overcurrent, overload protection
- Phase-loss protection
- Short-circuit protection

PC Tool-Himel studio

- Parameters setting and copy
- Monitoring drive status
- Monitoring IO terminal status and test
- Drive debugging and trial run
- Fault record and measurement
- Firmware upgrade

Support most communication protocols for the pump and fan

- One drive support most popular 3 protocols in the pump and fan applications
- Build in Modbus RTU/RS485 port
- Build in Modbus TCP/RJ45 port
- Provide BACnet IP extension card

Reliable made affordable

Features		Your benefits
Improved energy savings		
	◆ Integrated Eco-mode for V/f and V²/f automatically adapts the motor magnetic flux to save energy ◆ Improved special PID control with sleep mode helps to save more energy for pump application	◆ Energy savings during low dynamic load cycles such as pump and Fan ◆ Increase the potential savings by up to 70% ◆ Greatly reduces the return time of investment
High Robustness		
	◆ Stable operation under main input voltage fluctuations. Reliable operation with net tensions between 380V and 440V (-15%/+10%) ◆ Equipped with built-in category C3 standard EMC filter (≥11kW)	◆ Wider voltage range, increases robustness of the drive in difficult environment ◆ Automatic adaptation in case of unstable power supply ◆ Better electromagnetic immunity against signal noises. ◆ Supports longer connection cables.
Special pump functions		
	◆ Multi-pump control ◆ Built-in energy and flow meter ◆ Pump cleaning ◆ Fire Override mode ◆ Dual Ramp	◆ Control 3 pumps (with external I/O card) ◆ Measure energy and flow without an external sensor ◆ Clears the blockage in the pump ◆ Reduces the maintenance requirements ◆ Keeps the critical fans and pumps running in case of fire in a building ◆ Separate initial and final ramp ratio optimizes the motor start and stop
Pump-specific protections		
	◆ Dry run detection ◆ Frost and condensation protection ◆ Hammer effect protection. ◆ Overvoltage, overcurrent, overload protection ◆ Phase-loss protection ◆ Short-circuit protection	◆ Protects the impeller and rear housing against dry run. ◆ Protects the pump against moisture and water freezing inside pump. ◆ Controls the water flow when pipe is empty hence eliminating the hammer effect at the starting phase. ◆ Long lifecycle running in high humidity and high dust occasions ◆ Easy to maintain
PC Tool- Himel Studio		
	◆ Parameters setting and copy ◆ Monitoring drive status ◆ Monitoring IO terminal status and test ◆ Drive debugging and trial run ◆ Fault record and measurement ◆ Firmware upgrade	◆ Easy to commission
Support most communication protocols for the pump and fan		
	◆ One drive support most popular 3 protocols in the pump and fan applications ◆ Build in Modbus RTU/RS485 port ◆ Build in Modbus TCP/RJ45 port ◆ Provide BACnet IP extension card	◆ Easy system configuration with PLC,HMI and upper controller. ◆ Full flexibility to configure the baud rate, parity / stop bit and address by parameterization. ◆ Suitable for HVAC application

SPECIAL FEATURES AND BENEFITS

PID with Sleep mode

- ◆ Frequent start/stop of the pump wastes energy and causes wear and tear in the pump.
- ◆ PID with sleep mode switches the pump to sleep mode if the pressure increases by a fixed value above the set point.
- ◆ It will wake up the pump if the pressure inside the pipe falls below the lowest required pressure set by the user.
- ◆ PID with sleep mode helps save more energy and enhances pump life

Pump-cleaning function

- ◆ In the sewage water processing, the blockage in the pump will reduce the efficiency of the system and make the starting phase very difficult.
- ◆ With pump-cleaning function, the blockage can be swept automatically before the normal operation.
- ◆ It reduces the maintenance requirements

Special Pump Protections

- ◆ The drive can track the load and protect against
 - Dry pump run.
 - Leakage or pipe breakage
 - Blockage in the pipe.
- ◆ Protect the pump against abnormal loads.
- ◆ Protect impeller and rear housing against dry run.
- ◆ Extends pumps life.

Multi-pump Control (Fixed)

- ◆ Control up to 3 pumps with I/O card for start, stop and switchover by integrated PID controller.
- ◆ Fixed Type: Motor connected to the drive's output is fixed. VSD increases/decreases the number of motors run by the power grid depending on PID feedback.
- ◆ Floating Type: Motor connected to the drive is not fixed. Drive switches to the next motor and hands over the previous pump to the power grid.
- ◆ Smooth start and stop of each pump to ensure best performance
- ◆ Reduces the total cost of ownership

Fire Override mode

- ◆ The control system or wiring may be damaged in the fire disaster situation, which may disconnect the setpoint or run command of the critical fans in the stair well, tunnel, subway such important space.
- ◆ Fire override mode will keep the fans working without controller in critical situations and help maintain the air-supply and keep fireproof door closed.
- ◆ It keeps fans working to give the pressure in the stair well to force the fireproof door close to reduce the spread of fire and smoke

Frost and Condensation Protection

- ◆ Water frozen inside pump damages the pump. Frost protection keeps the motor slowly moving to avoid water freezing inside pump.
- ◆ In humid and cold environments, condensation can cause motor failure. Condensation protection keeps motor warm to get rid of moisture.

Energy and flow calculator

- ◆ Data will be more and more important for the energy audit to continuously improve the system performance.
- ◆ The water volume or flow data will indicate the real-time status. With the Energy and Flow meter, SMART Pump will estimate the energy consumption to explain the status of running pump or fan system to optimize the system

Dual Ramp

- ◆ Separate initial and final ramp ratio optimizes the motor start and stop. During start phase, pumps (esp. submersible pumps) are more prone to wear and tear if the ramp up is slow. A quick ramp up at start phase protects the pump from wear and tear.
- ◆ Slow ramp up after the initial phase improves the control accuracy.

Hammer Effect protection

- ◆ In pumping applications, during start phase high speed inrush water can hit the pump very hard which is know as "hammer effect".
- ◆ Smart Pump drive can fill the pipe smoothly at the start phase to avoid pump damage.

Target Applications

Irrigation

Sewage

Fountain

Sand pump

Circulating pump

Rod pump

Drying

Ventilation

Dust removal

Hot surface treatment

Air supply fan for boiler

Industrial fan

Centrifugal chillers

Reciprocating chillers

Scroll chillers

Specifications

Range Name		SMART Pump
Design		
Capacity range	Three phase 230V Class	AC: 200V(-10%)-240V(+10%) 2.2~45kW

*4T: 380V 3 Phase
** All VSDs have built-in removable keypad. HAVSPLKD is sold as a spare part.

Power quality improvement

You can also select any option to improve the power by different use case.

Notes : When the wire connecting drive to motor is greater than 50m and less than 100m, you had better add AC output reactor.
When the wire connecting drive to motor is greater than 100m and less than 300m, you had better add DV/DT filter.

Passive filter

Features

- When connected to the front end of the VSD, the total harmonic current after filtering by the passive filter is less than 10% of the fundamental current at full load
- The efficiency is greater than 98%, the power can reach 250KW, and the passive harmonic filter provides a cost-effective, stable and reliable harmonic solution

Technical Specifications

- Rated voltage: 400V
- Operating frequency: 50Hz
- Overload capacity: 1.6 times, 60s
- Full load efficiency: more than 98%
- Cooling mode: AN AF
- Harmonic filtering effect: the total harmonic current distortion rate THDi<10% at the input of the filter under full load conditions (background voltage THDu <2%)
- No-load current: less than 25% of rated current

Application

- Passive filter is used when you have requirements for THDi. It can decrease the harmonic component.

- Note:
- If 60Hz is required, please note 60Hz when placing an order.
 - Below (including) 55KW is AN natural cooling, 75KW and above is AF, with its own cooling fan

EMC C2 filter

Features

- This product has good interference suppression capacity, and can be used in equipment that requires strong interference suppression such as data processing systems, telecommunication systems, frequency converters and power purification.
- Prevent the electromagnetic interference generated by the device itself from entering the power line, and at the same time prevent the interference generated by the power line from entering the equipment; it can effectively suppress the radio interference from the audio equipment. Applicable wavelength range is 100K to 30MHz

Technical Specifications

- Rated voltage: 230V/400V
- Operating frequency: 50/60Hz
- Insulation resistance: line to ground: 300A and below: ≥ 1500MQ
- Line to ground: 1500VAC/2500VDC
- Leakage current (440VAC/50Hz): ≤36A <2mA
≤80A <3mA
≤200A <6mA
≤1200A <35mA

Application

- Power line filters are required for devices that can generate strong interference and for devices that are sensitive to external interference

DV/DT filter

Features

- When the DV/DT filter is used, the voltage at the motor end is still a pulse voltage, but the energy rise time will be reduced, greatly reducing the insulation pressure on the motor to prevent the motor insulation from breakdown.

Technical Specifications

- Rated voltage: 400V
- Operating frequency: 50/60Hz
- Insulation class: class F, H
- Max. current: 1.5×rated current, continued for 60s
- Protection grade: IP00-IP22

Application

- DV/DT filter is designed to protect the motor. When the distance between the inverter and the motor is too large, the peak voltage applied on the motor will exceed the rating of the motor insulation series. In this case, a DV/ DT filter is required to prevent the destructive effect on the peak voltage of motor.
- When the wire connecting drive to motor is greater than 100m and less than 300m, you had better add DV/DT filter.

Features

- Provide improved overload protection to line power
- Reduce current harmonic distortion generated by the VSD
- Improve the power factor of the input power supply
- Suppress the surge of the VSD on the power supply equipment

Technical Specifications

- Rated voltage: 230V/400V
- Operating frequency: 50/60Hz
- Max. current: 1.5×rated current, continued for 60s
- Protection grade: IP00-IP22
- Temperature rise: ≤85K
- Pressure drop: 2%

Application

AC input reactors are especially recommended in the following environments:

- Several converters are connected in parallel and tightly
- The line power supply has obvious disturbances (interference, overvoltage) from other equipment
- There is a voltage imbalance between the phases of the line power supply, and it exceeds 1.8% of the rated voltage
- A large number of frequency converters installed on the same line
- Reduce the overload on the COS ϕ correction capacitor if the device contains a power coefficients correction equipment
- The power supply capacity is 600 kVA and above, and the converter is installed within 10 m from the large-capacity power supply
- The converter is powered by a line with very low impedance (the transformer capacity is 10 times higher than the rated value of the converter)

AC output reactor

Features

- Limit the capacitive charging current of the connecting cable between the VSD and the motor and to passivate the voltage rise rate of the PWM wave output by the VSD.

Technical Specifications

- Rated voltage: 230V/400V
- Operating frequency: 50/60Hz
- Insulation class: class F, H
- Protection grade: IP00-IP22
- Voltage drop: <4%, if larger than this range, torque loss will occur
- Max. current: 1.5×rated current, continued for 60s
- Temperature rise: ≤85K
- Insulation resistance: 1000VDC

Application

- Limit dv/dt to 500V/us
- Limit the overvoltage on the motor terminals to: 1000V to 400V~ (rms value)
1150V to 460V~(rms value)
- Filter interference caused by opening the contactor between the filter and the motor
- Reduce the ground leakage current motor

Solar series VSD

Himel Solar VSD is an innovative solution that uses solar power as a reliable energy source for pumping water. It is to maximum solar energy to run the pump for maximum duration in a day by controlling the speed of the motor based on the power available from the solar panel.

Series	Voltage Class	Motor Capacity Table																							
		0.4	0.75	1.5	2.2	4	5.5	7.5	11	15	19	22	30	37	45	55	75	90	110	132	160	185	200	220	250
Solar	Single-phase 200 - 240V																								
	Three-phase 380 - 440V																								
Solar -SM	Single-phase 200 - 240V To drive single phase motor																								

• 2S = 200-240V Single Phase;4T = 380-440V Three Phase;
• SM= Drive Single Phase Motor

Build-in MPPT

Maximum power point tracking ensures that you get the most power output possible from your solar panel and maximizes the performance of your pump throughout the day.

Dual supply (AC & DC) capability

The VSD is customized to operate in dual supply mode, so the grid connected supply is used in the absence of energy from PV cells.

Automatic start-run-stop through out the day

With water level detection in the tank and pump overload and under-load protection.

Easy to use

- Compact design
- Easy to install with Din rail
- Can run with default setting, no parameter set need
- One-key recovery function

Special program function

- Energy meter
- Flow calculation
- Support single phase motor water pump

Pump-specific protection

- Dry run detection.
- Voltage limit
- Overvoltage , overcurrent, overload protection
- Phase-loss protection
- Short-circuit protection

General Highlights

Features	Your benefits
Build-in MPPT 	◆ Maximum power point tracking ensures that you get the most power output possible from your solar panel ◆ maximizes the performance of your pump throughout the day
Easy to use 	◆ Compact design ◆ Easy to install with Din rail ◆ Can run with default setting ◆ One-key recovery function ◆ Makes it possible to use in smaller cabinets ◆ No need to set additional parameters anymore ◆ Easy to operate and maintain
Dual supply (AC & DC) capability 	◆ The VSD is customized to operate in dual supply mode ◆ The grid connected supply is used in the absence of energy from PV cells
Automatic start-run-stop 	◆ Automatic start and stop according to the power of solar cell ◆ With water level detection in the tank and pump overload and under-load protection ◆ No need to operate ◆ Save more time and maintain cost
Special program function 	◆ AVR function ◆ Energy meter ◆ Flow calculation ◆ Support single phase motor water pump ◆ Automatic adaptation in case of unstable power supply ◆ Visible energy savings and flow ◆ Easy system upgrade
Pump-specific protection 	◆ Dry run detection ◆ Voltage limit ◆ Overvoltage , overcurrent, overload protection ◆ Phase-loss protection ◆ Short-circuit protection ◆ Automatic adaptation in case of unstable power supply ◆ Long lifecycle running in high humidity and high dust occasions ◆ Easy to maintain

Target Application

Target Application

Successful Applications

Swimming Pool

Livestock

Fountain

Fish Farming

Irrigation

Domestic Water Supply

Specification

Range Name		Solar VSD	
Range type		*2S/2S*SM	*4T*
Design			
Capacity range	AC input voltage(V)	220(±15%)(1PH)	380(±15%)(3PH)
	Power rating	0.4~4kW	0.75~160kW
	Mix. DC voltage(V)	440	800
	Start voltage(V)	200	300
	Min. DC voltage(V)	150	250
	DC input range(V)	200~400	300~750
	MPPT working voltage(V)	330	550
Frequency	Input frequency	50/60Hz	50/60Hz
	Output frequency	0-400Hz	0-400Hz
Overload capacity	Capacity	150% for 1min, 190% for 3s, 200% for 1s	150% for 1min, 190% for 3s, 200% for 1s
Control method	V/f	√	√
	Sensorless vector control	√	√
	Eco mode control	-	-
Start torque		0.5Hz, 150%	
Built-in PID		√	√
Keypad		Removable Keyboard	Removable Keyboard
Display		LED	
Multispeed Sequence		-	
I/O	DI1-DI4	NPN/PNP;Input: 9-30VDC	
	DO1	9-30VDC, max.50mA	
	AI1	V: 0-10V	
		I:0-20mA	
	AO1	V: 0-10V	
		I:0-20mA	
	RO(Ta,Tb,Tc)	NO: AC 250V below 3A/DC30V below 3A NC: AC 250V below 3A/DC30V below 3A	
Built-in communication (Max. speed)		0.4~15kW: extension card; ≥18.5kW: Build in	
Option	Communication	RS485,Modbus RTU (38.4kbps)	
	Extension operation panel	Support, cable length:2m, 5m	
Functionality		MPPT function	
		Support AC/DC supply	
		Auto start-run-stop	
		Energy/ flow calculator	
		Low Light protection	
		Eco-mode/PID with sleep mode/Special pump protection	
Installation Way		Wall mounted,Din-rail	
Environment and certificate	Operation temperature	The ambient temperature of inverter is -10℃~50℃ while air temperature change should be less than 0.5℃ per minute.The inverter will be derated once ambient temperature exceeds 40℃. It is not recommended to use the inverter if ambient temperature is above 50℃	
	Humidity	≤95%RH	
	Altitude	≤1000m, no capacity reduction	
	IP level	IP20	
	Global certificates	CE	

Specification

Range Name		Solar VSD	
Range type		*2S/2S*SM	*4T*
Design			
Features	Velocity ratio	1:200	
	Velocity precision at steady state	≤±0.2%	
	Frequency precision	±0.01Hz	
	Frequency resolution	±0.01%	
	Torque rise	Integrated auto-torque raising function; with manual- setting: 0.1%~10.0%	
	V/F control curve definition	1: Straight line V/F curve; applying to the constant torque load2: Multi-dots V/F curve3: Torque-stepdown characteristic curve (1.3 order)4: Torque-stepdown characteristic curve (1.7 order)5: Torque-stepdown characteristic curve (2.0 order)6: Customized V/F(V/F separation)	
	Acceleration/Deceleration Time	four groups of ACC/DEC time which can be selected by F28	
	DC braking	Start frequency: 0.00~Max. output frequency; braking time: 0.0~50.0sbraking current: 0.0~100%	
	Automatic voltage regulation(AVR)	The output voltage of the inverter is automatically adjusted to eliminate the influence of bus voltage fluctuations on the output voltage of the inverter	
	Auto current limitation	Limit current automatically to avoid tripping from frequent over current.	
	Auto PMW adjustment	Can adjust the PWM frequency automatically according to the load characteristic	
Protection	Special pump protection	Voltage limit, dry run,pump load monitor,Motor overload	
	VSD protection function	Over-current, over-voltage, under-voltage, over-heat, over-load, short circuit,phase loss	
	Cooling	Air- cooling, Forced air cooling

Himel Soft Staters

Himel Basic (HASBS) is a full-digital intelligent soft-starter for asynchronous motors to effectively control the starting current for asynchronous motors. It is a desired alternative to reduced-voltage motor starters like star-delta, resistance/reactance or auto transformer methods.

Himel Expert (HASXS) is an advanced soft-starter with a built-in bypass contactor that can control the starting inrush current of asynchronous motors. The integrated contactor reduces the total number of external components (wiring and contactor etc.)

Capacity Range (Motor capacity in kW)

HAS-XS-4T																			
HAS-BS-4T																			

Multiple start methods

- Current limit soft start
- Ramp voltage soft start
- Ramp voltage + current limit soft start

Motor protections

- Overcurrent, overload protection
- Phase-loss protection
- Over-heating protection
- 3-phase imbalance

High robustness

- High anti-interference capability
- Compact design

Easy to use

- 24 hour monitoring
- Quick diagnosis

Highlights

Features		Your benefits
Multiple start methods		
	◆ Current limit soft start ◆ Ramp voltage soft start ◆ Ramp voltage + current limit soft start	◆ Provides multiple starting methods to meet different application needs
High Robustness		
	◆ High anti-interference capability ◆ Compact design ◆ 3 sets of thyristors to control start/stop voltage	◆ Better electromagnetic immunity against signal noises ◆ Supports longer connection cables. ◆ Unique compact design with double-layer shell consisting of plastic upper layer and metal lower layer makes it durable and nice looking ◆ 3 sets of thyristors provides better performance, safety and reliability
Motor protections		
	◆ Overcurrent, overload protection ◆ Phase-loss protection ◆ Over-heating protection ◆ 3-phase imbalance	◆ Protect your motor against different abnormalities
Easy to use		
	◆ Easy tuning ◆ 24-hour monitoring ◆ Quick diagnosis	◆ 8 segment LED display to monitor different parameters and troubleshooting. ◆ Easy to maintain

Himel Soft Starters

Range		HASBS	HASXS
Applications		Controlled acceleration/deceleration of simple and complex machines	
Design			
Power Range	Three Phase 380...440V	11...600kW	
Drive	Control Type	Current limit, voltage ramp, voltage ramp + current limit	
Functions	Bypass	Need to install externally	Integrated
	Operation control mode	Keypad/external terminals/RS485 Modbus communication	
	Start mode	Current limit/voltage limit/current + voltage limit	
	Adjustable Acceleration/Deceleration time	√	√
	Start delay	√	√
	Emergency stop	√	√
	Current Limit function	√	√
	Initial voltage setting	√	√
	No/Light load detection	Protects against accidents such as belt tripping	
	Auto-restart	√	√
	Fault signal	Relay output - AC 250V 5A, DC 30V 5A	
	Multifunction relay output	Start delay, start, running, stop, complete stop,restart	
	Analog output	0~20mA / 4~20mA, optional	
	Protections	Overcurrent, overload, overheat, phase imbalance, phase-loss, light load, external fault	
	Alarms	Emergency shutdown, light load and restart	
Keypad		Pluggable	
Working Conditions	Rated insulation voltage	660V	
	Rated impulse withstand voltage	4kV	
IP rating	IP20	11 to 55kW	-
	IP00	75 to 600kW	11 to 600kW
Environment	Operation frequency	≤ 12 times/h	
	Ambient temperature	-10°C~ 40°C(Derating above 40°C)	
	Storage temperature	-20 ~ 65	
	Ambient humidity	Max. 90 % RH (no condensation)	
	Altitude	< 1,000 m (Deration above 1,000 m)	
	Vibration	< 5.9m/s² (=0.6g)	
	Type	No corrosive/inflammable gas, oil mist, dust or others	
Cooling Method	Natural air cooling	11 to 600kW	11 to 75kW
	Forced air cooling	-	93 to 600kW

BASIC Series (HASBS)

Presentation

Himel BASIC soft-starter(HASBS) is an intelligent soft-starter featuring latest electronic, micro-processing and control technology. It offers effective control for the starting current of asynchronous motors via voltage control. It is an ideal alternative to the reduced voltage starters like star-delta, resistance/reactance or auto-transformer methods.

It can cover motors from 11kW to 600kW.

Applications

With its unique, compact design it can be used in harsh environments with the focus on human and other equipment safety. It can be used in typical building or industrial applications:

- Pumps
- Fans
- Compressors
- Conveyers
- Complex and advanced machines

Connection diagram

Features

- HASBS has 3 starting modes: current-limit, voltage ramp and current limit + voltage ramp.
- Built-in protections include overcurrent, phase loss, short circuit and overheat.
- Multiple control ways like keypad, I/O terminals and Modbus communication.
- Multifunctional output relays provide different signals based on application requirements.

Wiring diagram

EXPERT Series (HASXS)

Presentation

Himel Expert Soft-starter(HASXS) is an advance soft-starter to control the starting and stopping of asynchronous motors via voltage control. It can cover motors from 11kW to 600kW. HASXS comes with a built-in bypass contactor hence reducing the total number of external components required by the system.

The starting inrush current to the motor is controlled by managing the voltage to the motor. Silicon-controlled rectifiers (SCRs) are used to control the voltage. These SCRs are bypassed at the end of starting phase using built-in contactor.

Integrated keypad allows user to program the soft-starter and monitor different parameters according to the customer requirements.

Applications

Himel Expert soft-starter (HASXS) is designed for rugged applications with the focus on safety and reduced commissioning times. It can be used in typical building or industrial applications:

- Pumps
- Fans
- Compressors
- Conveyers
- Complex and advanced machines

Features

- Integrated bypass contactor.
- HASXS has 3 starting modes: current-limit, voltage ramp and current limit + voltage ramp.
- High performance microprocessor makes it highly reliable.
- Opto-electronic isolation provides high anti-interference performance.
- New optimized and compact design
- Built-in protections include overcurrent, phase loss, short circuit and overheat.
- User can monitor different system parameters hence making it easy to maintain
