DAY LIGHT SWITCHES

SELCON

This Selcon Photo Control Switch is an automatic light-sensing switch designed to effortlessly automate outdoor and security lighting by turning fixtures on at dusk and off at dawn. Operating on an ambient daylight threshold, it turns connected lights on when natural light drops below approximately 31.5 Lux and shuts them off when morning light reaches around 125 Lux, eliminating the hassle of manual switching while keeping energy consumption low.

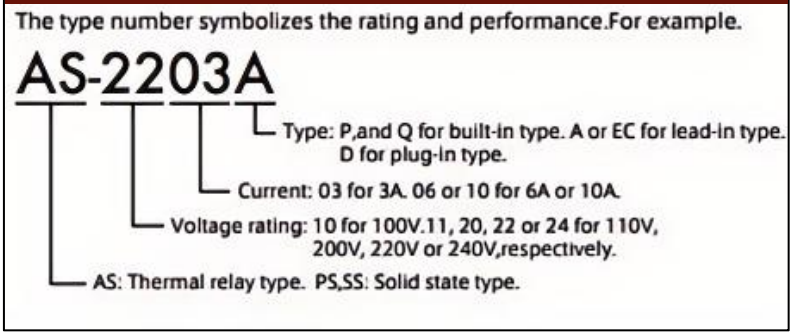

HOW TO CONNECT PHOTO CONTROLS

Lead wire black to electric power source
Lead wire white to common
Lead wire red to lamp(load)

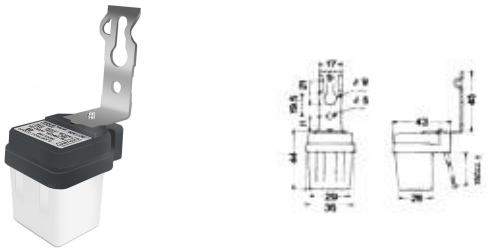

TYPE NUMBER

The type number symbolizes the rating and performance.For example.

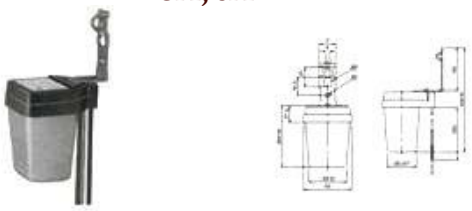

Description
